Power BI Education Track—Virtual Classroom

A Day of Power Query (Query Editor) for Power BI

Target Audience

Power Query is a data transformation and data preparation engine. Power Query comes with a graphical interface for getting data from sources and a Power Query Editor for applying transformations. If you or your team need to fetch data from different sources and transform it so that it can be used for further analysis, then this course will introduce you to Power Query features from scratch.

Everybody working with data models can use Power Query to extract, clean, combine, merge data before adding the data to a data model.
