Power BI Education Track—Virtual Classroom

Getting to Grips with the Power BI Service

Target Audience

As a designer, your typical workflow usually starts by creating reports in Power BI Desktop. Then you publish them to the Power BI service, where you can continue modifying them. You also create the dashboards based on your reports in the Power BI service.

The aim of this one-day course is to orient you to the Power BI service: what the different elements are, how they work together, and how you can work with them.

This course is ideal for those looking to grasp the complete Power BI workflow, from sourcing data, modelling the data to creating and sharing data visualisations, and understanding how to get more from their published reports and dashboards.

The Content

- * Power BI Overview
- * Working with Report & Dataset Options
- * Modify an existing Report
- * Creating a Report in the Service
- * Creating & Managing Dashboards
- * Overview of Data Refresh options
- * Content Sharing Options
- * Using Workspaces and Workspace Apps
- * Introduction to Workflows

Virtual Classroom

Set-Up

When setting up our Virtual Classroom, we have striven to offer the same quality of customer experience as attained through our 'face to face' training environment

Take a look at the great feedback on our **About Virtual Classrooms** tab <https://fasttrackcomputertraining.co.uk/about-virtual-classrooms>

The Fast Track Virtual Classroom is currently choosing Microsoft Teams as the main Conference platform. Therefore, before joining the Virtual Classroom you will need to download Microsoft Teams.

Delegate Pre-Requisites

Attendees should be comfortable creating reports using Power BI Desktop and may have already published reports to the service. No in-depth prior use of Power BI service is required. Part of the course will be 'hands-on' and part will be trainer demonstration.

Course Duration

This is a One Day Course

Course Details

Courses commence at 9:30 a.m. through to 4:30 p.m.

All delegates will receive Training Courseware following the courses in pdf format together with a Course Attendance Certificate

Corporate Courses

Virtual Classroom Corporate courses are available
